

# PE Cloud Migration

## Business Challenge

There are many benefits to adopting public cloud platforms, but it can be challenging to understand how best to take advantage of specific provider capabilities, and even more challenging to securely bridge your existing automation capabilities across public cloud and on-premises infrastructure.

PE Cloud Migration Service helps your organization solve these problems by giving you access to Puppet professionals with deep Puppet Enterprise and cloud expertise, to guide you in developing deployments and architectures that both meet your needs and adhere to Puppet and industry best practices.

## Who Will Benefit?

Puppet's PE Cloud Migration Service is designed for organizations that:

- Are using or are planning to use Puppet Enterprise to manage virtual machines both on-premises and in the cloud
- Want a first-class and consistent hybrid infrastructure management deployment

## Customer benefits

- A consistent and powerful hybrid infrastructure management solution.
- An optimized migration path for migrating PE workloads from on-premises to AWS and vice-versa.
- Increased control and elasticity so you can scale efficiently.

## Expected outcomes

- Secure and efficient architectural design for PE infrastructure on the chosen public cloud provider.
- Defined and standardized workflows to fit business needs and organizational constraints.
- A functional PE installation on the chosen public cloud provider.
- A defined migration path.

## What You Can Expect

Our Puppet cloud experts will collaborate with your team to understand your goals, leverage proven deployment strategies and designs, and leave you with a functional installation of Puppet Enterprise, designed to manage a hybrid environment.

The high level stages of the service are:

1. Kick-off meeting to define priorities, timelines, and business goals
2. Analyze existing Puppet Enterprise deployment
3. Identify initial workloads to be migrated
4. Define migration plan
5. Execute migration plan

## Assumptions

You are a current Puppet Enterprise customer and you want to migrate PE to AWS.
